Final Declaration

Appreciating

- the continued patronage of the President of the Italian Republic, H.E. Giorgio Napolitano and support of the Permanent Mission of Italy;
- the participation of the UN representative of the governments of Bangladesh, Benin, El Salvador, France, Italy, Japan, Maldives, Morocco, Palau, Sri Lanka, Tanzania, Kenya; and the UN organizations: DESA, ECOSOC, FAO,ITU, UNAFF, CICT- UNESCO, Under-Secretary-General and High Representative for the Least Developed Countries;
- the partnership of the European Parliament and European Commission, in the person of its Vice-President Neelie Kroes;
- the crucial role of OCCAM, the Observatory for the Digital Revolution, founder and main organizer of the Infopoverty Conference, with the Infopoverty Institute at the University of Oklahoma,

Taking into account the results of the proceedings of the Conference, the participants converge on the following

INFOPOVERTY DECLARATION 2014

- Approaching 2015 at the conclusion of the MDGs plan, it appears evident that the new technologies, and in particular the digital ones, have played an important role in changing our societies and could accelerate even more the achievement of these goals.
- Facing the post-2015 Agenda elaboration, the information and communication technologies (ICT) could have a determinant capacity in achieving the Sustainable Development Goals (SDGs), if the innovations will be empowered as key social players, and not only as market goods for consumers.
- The social complexities that digital technology helps to make fluid are at risk of congealing and halting democratic processes.
- New paradigms are imposing that are producing new practices involving progressively all population, in particular the youngsters, who will be protagonists of the next digital era, where the existing poverty gap will overcome by global connectivity, able to interact values, culture, goods and resources, of the people, in a horizontal process, which can revitalize the decline of the ancient regime, lighting a new global challenge.
- The Conference put in evidence, through best practices and projects, the new strategic solutions based on the social use of ICT, beyond the stage of mere information, as tools for a real development, for both the supply of essential services, such as education, e-health and food security, and for the creation of infrastructure for the exchange of proficiency, knowledge, products, and economical and financial resources, facilitated by the use of the Digital Services Global Platform (DSGP) elaborated in the 13th Conference and validated at ECOSOC AMR last July.
- A clear vision emerge from the Conference: reduce poverty empowering the people capacity, supplying the needed services to everyone, with ICT devices, in order to ensure an adequate level of health care and food security, and start the process of social inclusion by an interactive system of communication.
- As we are living in a world where almost all people are interconnected, in necessary that national and international institutions take in charge this opportunities, with new strategic plans, encouraging inclusion, exclusion, making citizens active, creating jobs, overcoming the
traditional barriers of languages, territories, economical and financial hegemonies, with open and sharing platform of global cooperation

- The Infopoverty Program 2014-2015, taking in charge all this suggestions emerged from the debate, will transale it in actions, thanks to the collaboration expressed by the countries, UN, academia, NGOs and companies, representatives, acting as a real operational community, sharing experience, applying the solutions, elaborating new project tailored on the need of the poorest populations, in the spirit of the UN mission, forwarding the challenge of post 2015 agenda: the Sustainable Development Goals.

DELIBERATIONS

Adhering to the willingness of all participants to join forces and give continuity to the discussion we decide:

1. to change the Infopoverty Conference into a Permanent Conference Organization, integrated with the UN system, with the task not only to ‘convince the Stakeholders of SDGs of the importance of ICTs’ , but mostly to provide the concrete implementation of the new ICT solutions able to support and accelerate the UN Sustainable Development Agenda (SDGs) and the Last Developed countries (LDC).

2. to elaborate the Infopoverty Program as the synthesis of the main practices and projects presented, which constitute a peculiar selection of the best solutions ready to be applied by the UN system and governments to accelerate the MDGs achievement and able to give support to incoming SDGs. Empowered through the Digital Services Global Platfom, this new practices will provide easy access to the basic e-services, illustrated in the Report, with the contribution of all participants, operating as a Community, to express the new digital capacity to solve problems, still unachieved.

3. to start an intense interaction as a Infopoverty Community in order to define the Infopoverty executive program that could be centered on following focus:
   i. ICT for Gender and disability, lead by DSPD- UNDESA, with the convergent applications emerged in the discussion

   ii. E-health: E-MedMed project, promoted by OCCAM, for the South Euro-Mediterranean region, as partnership integrator of advanced ICT stakeholders, ready to be implemented by the participants in other contest like LDC and Small Island Countries

   iii. Food Security: related initiatives for EXPO 2015, following the invitation of the representative of Milano Municipality, The applications of ICT for Africa and developing countries empowered by the network of service providers worldwide aimed at providing assistance to remote centers with a permanent structure that can serve as a world e-center for food-security.

   iv. E-learning lead by Infopoverty Institute of Oklahoma University, to empower local universities and educational infractures

   v. Industrial ict sector, lead by WITSA with IWG, to organize the Infopoverty followup at the World Congress on IT on 30 september 2014.

OCCAM is in charged to continue assuring the general secretariat, to sharing this Declaration and providing coordination to realize the Infopoverty Program.
